

4. The following table contains Ladislaus von Bortkiewicz's data on deaths of soldiers in the Prussian army from kicks by army mules. The data refer to 10 army corps, each observed for 20 years. In 109 corps-years of exposure, there were no deaths, in 65 corps-years there was one death, and so forth.

Number Deaths	Number Corps-Years
0	109
1	65
2	22
3	3
4	1
5 or more	0
	200

- (a) Estimate the mean number of deaths per corps year.
- (b) Test whether probabilities of occurrences in these five categories follow a Poisson distribution (truncated for 4 and above).
